#### Programme description

Pre-school teacher studies are designed with a professional focus. The academic profile of the programme emphasises the enquiring and creative child. The complete individual, and the child's right to develop into their own person, that takes center stage in the activities of pre-school teachers. One important task is related to the child's growth and development: giving the child the opportunity to develop the knowledge, skills and attitudes, with a basis in culture and values, that provide the basis for future personal growth and learning in school and in the community. Pre-school teacher studies emphasise pedagogical leadership and qualify graduates for pedagogical work with children in kindergartens.

#### Admission requirements

Higher Education Entrance Qualification
Language requirement
View general admission information
View specific application deadlines

#### Further education

Graduates of the programme qualify for entry to various Master degree programmes.

#### Study abroad

The programme enables students to take 30 ECTS credits (a semester) abroad, in addition to the opportunity of having supervised professional training abroad.

Costs

Semester registration fee and course literature.

#### Assessment methods

The programme uses different forms of assessment (see course descriptions). Assessments takes the form of written exams, portfolio assessment, home exams, online exams, oral exams and practical exams. Information about compulsory submissions, compulsory participation in class, practice and other forms of assessment specified as "compulsory" are given in the course descriptions.

#### Programme evaluation

The programme is evaluated via student questionnaire, as well as by the programme director. The evaluations form a part of the University's quality assurance system.

#### Qualifications requirements and regulations

Refer to applicable legislation, regulations and related guidelines

#### Suitability

The students are under suitability assessment throughout the course of study
