

The lectures will take place in the form of half-days. We plan to do two weeks with two short sessions, and the rest of weeks with one half-day. Additionally some parts of the sessions will be pre-recorded (see below marked as A) as well as for most parts of the sessions that will be in real-time (see below marked as S), we will make the recordings available to you. This allows the participants to slot the sessions in their working life more easily.
