

Oral presentation

PhD conference: PhD in Science of professions, 25 and 26 March, 2026

Third, fourth- and fifth-year PhD candidates are invited to submit an abstract and give a 10-minute oral presentation

All sessions aim to contain both pitches, flash talks and oral presentations, with one senior chair and one or two co-chairs. Session number and presentation order will be available by searching your name in the abstract book.

A selection of the submitted abstracts is chosen for oral presentation.

The selection of abstracts for oral presentations at the PhD conference will be based on the degree of adherence to the IMRAD structure of the abstract and how clearly the study is communicated in the abstract. IMRAD is an acronym for Introduction, Methods, Results, and Discussion.

How to do an oral presentation

You will be given 10 minutes for the presentation in English followed by 9 minutes for questions and feedback. The presentation should correspond to a presentation given at a scientific conference.

The presentation should be understandable to non-specialists, and it is recommended that you limit your presentation to a maximum of 10-15 slides. The presentations should include a short discussion of how the project relates to Science of Professions, focusing on language, relations, or actions.

Feedback

The chairs are instructed to give you a short and constructive oral feedback on your presentation. The chairs will, among other things, consider the following:

- Is your presentation comprehensible to people outside your research area?
- Are your slides easy to understand, and do they support your oral presentation?
- Are your research aims and hypotheses clear?
- Can you convey to the audience the importance and perspectives of your research to Science of Professions with focus on language, relationships, or actions?
- Are results and conclusions presented clearly?

The stage of the presenter's PhD project will be considered.
